 handover date: **2023 Q1**

HELLOZERO

Sustainability plays a defining role in our activities. We focus on reducing greenhouse gas emissions, improving energy savings, and targetting carbon neutrality. In addition to protecting the environment, we are also committed to mental and physical health preservation and social responsibility. That is why our ESG targets have been defined to achieve the climate goals set by the United Nations and our detailed climate neutrality roadmap has been developed until 2035.

This includes that we develop our buildings from the design stage to meet the highest, Outstanding level of the **BREEAM New Construction** category, and the requirements of the **EU Taxonomy**. Furthermore, from 2028, we aim to make our new developments' operations become **Net-Zero**, using **100% renewable energy**. By 2030 we are to **decrease our developments' embodied carbon** by 50% compared to our base values.

Our ultimate goal is to achieve climate neutrality in the entire supply chain in relation to Scope 1, 2, and 3 emissions by 2050.
